DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 1-10 and 12-36 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 12 and 20-36 are rejected under 35 U.S.C. 102(b) as being anticipated by Chen (European Patent Application # 859,500).

Regarding claim 12, Chen teaches radio means for performing radio communication with a base station to which the center is connected (Figure 1 and column 3, line 53- column 4, line 6); speech communication means for inputting/outputting a speech signal between said speaker and said microphone by performing speech communication with said center (column 2, lines 29 - 38 and column 4, lines 54 - 58); communication control means for switching speech communication by said speech communication means and packet communication by said packet communication means (column 5, lines 23 - 35) and Chen further teach of packet communication means for outputting at least one of image information and character information to said display screen by performing packet communication with the center (Chen: column 5, lines 14 -35).

Regarding claims 20, 22, 24, 27, 29, 30, 32 and 34, Chen teaches a system, comprising a center having a speech communication and text communication function; and a portable terminal

Art Unit: 2618

wherein said portable terminal comprises sending means for sending a speech signal to said center by said speech communication during execution of said text communication with said center; and wherein said center comprises: receiving means for receiving said speech signal (column 2, lines 29 - 38 and column 4, lines 54 - 58); searching means for searching for information based on said speech signal; and sending means for sending said information to said portable terminal by said text communication (Chen: column 5, lines 14 - 35).

Regarding claims 21, 23, 25, 28, 33 and 35, Chen teaches said text communication is performed by packet communication (Chen: Figure 2 and column 4, lines 44 - 58).

Regarding claims 26, 31 and 36, Chen teaches display means (Chen: column 5, line 14-25).

Allowable Subject Matter

Claims 1-10, 13-17 and 19 are allowed.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period

Art Unit: 2618

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
